Independent Verifier's Report on Performance Record

Avonbridge Capital

We have examined the accompanying Statement of Investment Performance and Notes to Statement of Investment Performance for **V-XL Trading Strategy** for the periods August 1, 2024 through March 31, 2026. Avonbridge Capital is responsible for the Statement of Investment Performance and Notes to Statement of Investment Performance. Our responsibility is to express an opinion on this performance presentation based on our examination.

Scope of Work

Our examination included examining evidence supporting the Statement of Investment Performance and Notes to Statement of Investment Performance for the **V-XL Trading Strategy** and performing other procedures, as we considered necessary in the circumstances. Our examination included procedures to obtain assurance that performance results reflected in the Statement of Investment Performance were calculated using criteria as outlined in the Notes to Statement of Investment Performance. We believe our examination provides a reasonable basis for our opinion.

Opinion

In our opinion, the Statements referred to above present, in all material respects, the performance record of the **V-XL Trading Strategy** for the periods August 1, 2024 through March 31, 2026, based on the criteria set forth in the Notes to Statement of Investment Performance. The Statement of Investment Performance and Notes to Statement of Investment Performance are an integral part of this opinion.

Avonbridge Capital
Notes to Statement of Investment Performance

1. Investment Management

Avonbridge Capital provides investor access, onboarding support, and ongoing relationship management for eligible investors seeking exposure to institutional alternative investment strategies. Through its relationship with Vanquish, Avonbridge provides access to professionally managed systematic trading strategies across foreign exchange, commodities, and digital asset markets, supported by institutional infrastructure, independent oversight, and third-party administration.

2. V-XL Strategy Description

V-XL is engineered with a significantly lower risk profile compared to other systems in its category. By combining active diversification with advanced exposure control, V-XL delivers a level of robustness that exceeds what is achievable with our FX-only portfolios. The system is built on a foundation of 14 rigorously vetted subsystems, trading a mix dominated by FX. At its core lies an advanced strategy optimization engine that leverages correlation analysis, genetic algorithms, and machine-learning-based ensemble filtering.

3. Calculation Methodology

The performance returns of the Trading Strategy represent actual trading results. The returns have been prepared using the following methodologies consistently applied. Other methods June produce different results:

- Performance is calculated net of transaction costs and gross of management fees. Spreads and commissions are reflected in actual trading results as executed.
- Performance is calculated using the time weighted rate of return methodology. Monthly returns are geometrically linked to produce annual and year to date returns.
- Performance includes realized and unrealized gains and losses.
- Trade date accounting is used for calculation and valuation purposes.
- Securities are valued using broker values.

4. Other Notes

- Past performance is not indicative of future performance.
- The Strategy uses complex instruments and comes with a high risk of losing money rapidly due to leverage.
- The Independent Verifier's Report on Performance Record and Statement of Investment Performance are an integral part of this presentation.
